- New launches and updates

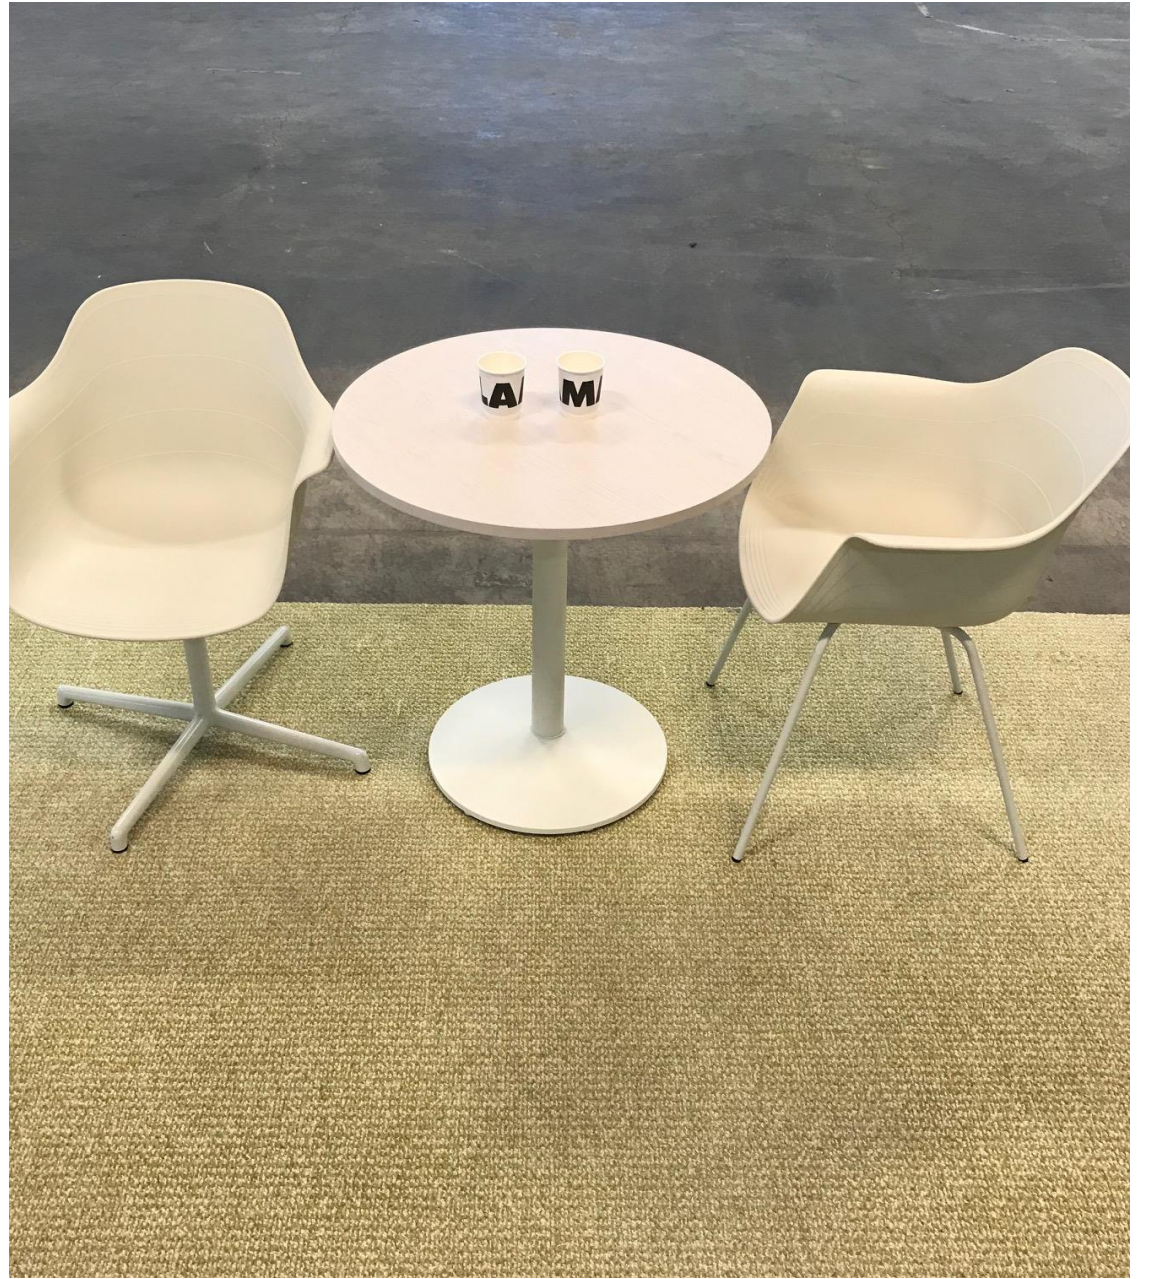

Grade & Grade *Plus+*

GRADE: The purpose of the shell for the Grade series is to be unique, no matter which frame you add the visible grades in the shell are making every produce unique in its design.

GRADE PLUS+ :When we integrate the armrest in the shell we make the construction even more reliable. Out of this reason we can use material with more variation in the mechanical properties why we added a black version that comes from postconsumer recycled material. The model is generous and focus has been on comfort in many different positions.

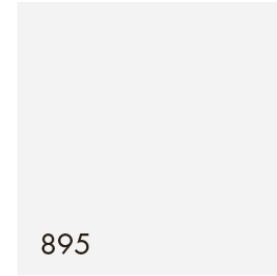

Molded in Sweden,
180km from the
Lammhults site.

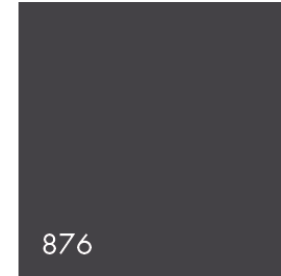

Start up range

The new Plus-shell is available in white, graphite, beige and red colour but also in a black version, mentioned earlier.
