\*Postconsumer Recycled content -Waste generated by households, commercial or industrial facilities. Waste that can no longer be used for its intended purpose.

\*Preconsumer Recycled content - Material diverted from the waste stream during the manufacturing process.

\*Regional Materials - Materials that have been extracted, harvested or recovered, as well as manufactured, within 500 miles of the project site (air distance).

For recycled materials such as steel, you do not need to specify the original mine site, but rather the place that the steel is taken from.
