

# Lammhults & the Nordic Swan Ecolabel

Our Nordic Swan Ecolabeled products

LAMMHULTS

# Lammhults and the Environment

At Lammhults we work with timeless designs of the highest quality to ensure the longest product life. In order to reduce the consumption of resources and lessen the environmental impact we develop and produce products from materials that can be recycled as materials or energy. We strive to prevent pollution in all of our company processes and work to successfully reduce the environmental and climate footprint of our production facilities.

One step to assure this is to certify selected volume products according to the Nordic Swan Ecolabel, which is the toughest eco-labelling system in the industry. Our strategy of certifying primarily our volume products means that we reach the greatest positive effect.

## What is the Nordic Swan Ecolabel?

The Nordic Swan Ecolabel is an official label and a standard specifying absolute requirements. With products labeled with the Nordic Swan Ecolabel, consumers and professional buyers have a better option to choose products and services based on how environmentally friendly they are.

Nordic Swan Ecolabeled furnitures and fitments have the lowest environmentally impact in their category. The requirements are based on a lifecycle assessment of the product and requirements are imposed to production, use and waste. The requirements promote the use of certified wood raw materials as well as recycled plastics and metals. Furthermore the use of fewer substances that are harmful to health and environment and a high degree of durability and recyclability are taken into consideration.

Lammhults work towards reducing the environmental impact involves the requirements The Nordic Swan Ecolabel has put together for furniture companies.

'The Nordic Swan ECO Label is a world-leading environmental label with high awareness and credibility'

## Requirements for the Nordic Swan Ecolabel

- Sets strict environmental requirements in all relevant phases of a product's life cycle.
- Sets strict requirements for chemicals used in ecolabeled products.
- Tightens requirements for goods and services continuously to create sustainable development.
- Certifies and verifies that all requirements are met before a product is approved.

### Why choose products with the Nordic Swan Ecolabel?

When you choose Lammhults Nordic Swan Ecolabeled furniture/fitments this will in turn promote:

- Sustainable wood in the production.
- Minimum impact from substances that are harmful to health and the environment.
- Reduced climate and energy impact.
- High quality and documented fitness for use.
