

ONO

Design: Susanne Grønlund

Ono is a light wooden chair with welcoming design language rooting strongly to the Scandinavian design tradition giving the chair a touch of history. Ono chair takes these roots into the future referring to contemporary needs, architecture and interiors without compromising on functionality, comfort and aesthetic values. The construction is obvious in its own way, the back carries and lifts the seat from the frame giving the chair a light and inviting expression. The opening in the backrest allows to position the lower part of the back ergonomically right. Further, the opening makes the handling and cleaning of the chair easy.
