

hm106 Quiet Seating

Magnus Long's hm106 Quiet Seating collection of exquisitely proportioned benches and sofas, have a looping angular under-frame supporting an upholstered seat, cantilevered at both ends.

Available in three lengths and two depths, the deeper pieces have an option for a low backrest. The frame is available in solid oak or light grey powder coated steel, and the collection can be upholstered in a wide range of fabrics, vinyls and leathers. Multi-tone upholstery is available - seats and backs can be specified in different fabrics or leathers. The collection includes three tables; a high table for laptops, and two low side and coffee tables with black soft touch laminate tops.

'The original idea for the cantilevered, linear quiet bench came from watching how people mark-out zones for themselves on benches with their bags or books. It's an obvious observation but it is interesting to see how people use large flat seating spaces, especially from above where you can look down and see the different 'territory' marked out.' - Magnus Long

The collection was awarded a Design Guild Mark in 2016.

Since studying furniture and product design at Nottingham Trent University and exhibiting his first designs at the Milan Salone in 2005, Magnus Long has rapidly gained recognition as one of London's most accomplished designers. Having co-founded the prolific and award-winning design collective Viable London, he formally established his own practice in 2012 to design furniture and products that are 'positive, understandable and relevant to their audience' for both contract and domestic markets. He is an associate lecturer at Central Saint Martins University.

Long's hm106 Quiet Seating developed from one of his furniture designs for the celebrated CSM King's Cross campus that opened in 2012.

In 2016, hm106 was awarded the Design Guild Mark; the same year Long's hm108 Plump collection was launched.

product contents (based on hm106g)

Hitch Mylius have been making beautiful and contemporary upholstered furniture in north London for over 50 years.

Our key environmental benefits include:

- ✓ Many of our key suppliers are local to us – our sofa frames and metalwork suppliers are 12 miles from our factory.
- ✓ We use water based glues.
- ✓ We use FSC certified timbers.
- ✓ It is our policy when dealing with waste to follow the waste hierarchy; prevent, reduce, reuse, recycle, recover.
- ✓ We are certified to BS EN ISO 14001:2015 and have been since October 2010.
