

hm77 Cake

Kazuko Okamoto's hm77 Cake is a simple, inventive and playful collection of trapezoid units that combine to form creative combinations from curving reception to tessellating breakout seating. The simple geometry of the wedge-shaped seat is available in three versions: with left- or right-handed backrest, or without back.

Multi-tone upholstery is available & panels can be upholstered in different fabrics or leathers.

Power and data units can be installed into the hm77 Cake.

For more information, [click here](#).

After graduating from Tokyo's ICS College of Arts in 1998, Okamoto worked as a designer in Japan for ten years before moving to Europe. Having settled in Milan, she is now working as a freelance furniture and product designer with commissions from a number of high-profile international clients. The hm77 modular seating system launched in 2010 and typifies Okamoto's characteristically playful approach to furniture design.

And the future.....

product contents (based on hm77a)

Hitch Mylius have been making beautiful and contemporary upholstered furniture in north London for over 50 years.

Our key environmental benefits include:

- ✓ Many of our key suppliers are local to us – our sofa frames and metalwork suppliers are 12 miles from our factory.
- ✓ We use water based glues.
- ✓ We use FSC certified timbers.
- ✓ It is our policy when dealing with waste to follow the waste hierarchy; prevent, reduce, reuse, recycle, recover.
- ✓ We are certified to BS EN ISO 14001:2015 and have been since October 2010.
