hm82 Edith

hm82 Edith

Designed specifically for healthcare use, Kenneth Grange's hm82 Edith collection comprises ergonomically designed high-backed and low-backed chairs with or without arms. Applications include patient seating for consulting rooms in hospitals, clinics and surgery's as well as residential care and respite spaces. It is an exciting departure from the traditional and dated furniture currently available for this growing and increasingly sophisticated market.

The chair is available in a wide range of fabrics including selected vinyls and coverings with antimicrobial finishes. Multi-tone upholstery is available - inside and outside panels can be specified in different fabrics. The high back has a button feature as standard - it can be specified with cross-stitch detail if required.

For more information, [click here](#).

Acknowledged master of British product design, octogenarian Sir Kenneth Grange CBE, RDI is the creator of such notable design icons as the Intercity 125 train, Kodak Instamatic camera and the London taxi. One of the founders of world-renowned multi-disciplinary consultancy Pentagram in 1972, today Grange still continues to work with design-led British companies including Anglepoise and Margaret Howell.

In late 2009, Hitch Mylius commissioned Grange to develop the first of a new seating collection designed specifically for healthcare use, addressing the particular needs of the elderly. Thrilled to be working on a product aimed at an older generation of design-aware users, Grange admits that hm82 has been one of the most challenging – and rewarding – jobs he has ever tackled.

- **80% recyclable content**

product contents (based on hm82a)

Hitch Mylius have been making beautiful and contemporary upholstered furniture in north London for over 50 years.

Our key environmental benefits include:

- ✓ Many of our key suppliers are local to us – our sofa frames and metalwork suppliers are 12 miles from our factory.
- ✓ We use water based glues.
- ✓ We use FSC certified timbers.
- ✓ It is our policy when dealing with waste to follow the waste hierarchy; prevent, reduce, reuse, recycle, recover.
- ✓ We are certified to BS EN ISO 14001:2015 and have been since October 2010.
